# If only I could see what's going on inside my ears...

To actually see inside your ear canal - it would be fascinating, wouldn't it?

But more importantly, it might help you understand why you may be experiencing problems like:

- Hearing but not being able to distinguish certain words.
- Frequently asking people to repeat themselves.
- Difficulty hearing on the phone.

Now you can get a picture of what's happening inside your ear *literally*. It won't cost you a penny, and you're under no obligation.

With state-of-the-art Video Otoscope technology, \*a Miracle-Ear Hearing Care Professional uses a tiny camera to videotape the inside of your ear canal. This procedure is completely painless.

While the camera is running, you can watch this "guided tour" of your ear canal on the TV monitor. You'll also receive a full color printout of the video image to keep or share with your physician.

In addition, we are offering audiometric hearing evaluations, to help further identify your difficulties and assist in amplification selection.

**There is no charge or obligation for these services.**

**Your Video Otoscope exam may reveal such common problems as:**

- Excess wax build-up.
- Damage to the eardrum.
- Other conditions which may make it difficult to hear clearly.

***Video Otoscope exams are held on dates and days below!  
Call today to schedule your appointment.***
